

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 Dec 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	N/A
Annual return (after deductions for charges but before tax)	N/A
Market index annual return (reflects no deduction for charges and tax)	3.03%

The market index return is Bloomberg Global Aggregate Bond Index (hedged to NZD). This has been the market index since the inception of the fund.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

What fees are investors charged? See note 2

Investors in the Dimensional Global Bond Sustainability PIE Fund are charged fund charges which are:

	% of net asset value (inc. GST)
Total fund charges	0.32%
Which are made up of:	
Total manager and admin charges (inc. GST)	0.32%
Including:	
Manager's basic fee (inc. GST)	0.32%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

Manager's basic fee includes an estimate of the charges incurred in the underlying fund in which the fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the underlying fund's disclosure documents.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Dimensional Global Bond Sustainability PIE Fund on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor See note 3

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund when the fund received its first contribution, 20 November 2024 and did not make any further contributions. At the end of the period to 31 December 2024, Anthony received a return after fund charges were deducted of \$29 (that is 0.29% of his initial \$10,000). This gives Anthony a return after tax of \$20 for the period.

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 19 November 2024 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund only started accepting contributions on 20 November 2024, historical fee information is not available.
3. As the fund has not existed for a full year, figures in this example are based on returns from the date of the first fund contribution (20 November 2024).
4. Country is the country of exposure. Credit rating agencies Moody's Investor Service, Fitch Ratings, and Standard & Poor's Corporation rate the credit quality of debt issues. For reporting purposes, generally a composite rating based on stated ratings from Nationally Recognised Statistical Ratings Organizations ("NRSROs") is assigned. For example, if Moody's, Fitch, and S&P all provide ratings, a median rating is assigned. In certain instances, such as Pre-Refunded Municipals and US Treasury and Agency securities, an internal rating is assigned by the investment manager, which can only be as high as the highest stated credit rating from an NRSRO.
