Investment Manager:

Name: Corion Capital (Pty) Ltd
Contact Details: 021 831 5401

Manager:

Name: FundRock Management Company (RF)
(Pty) Ltd
Contact Details: 021 202 8282

Counterparty Exposure:

A value that best reflects the portfolio's exposure to a relevant counterparty and accurately reflects the economic loss that the portfolio is exposed to if the counterparty defaults on its obligations.

Value-at-risk (VaR) Approach:

A measure of a maximum expected loss of a portfolio at a given confidence level over a specified time period, expressed as a percentage of the portfolio's net asset value.

Collateral Assets:

Collateral is an asset that a borrower offers as a way for a lender to secure the loan. If the borrower stops making the promised loan payments, the lender can seize the collateral to recoup its losses.

Re-use (Re-hypothecate) collateral assets:

The practice by which prime brokers re-use the collateral posted by the investment manager to service other arrangements.

Total Expense Ratio (TER):

A measure of a portfolio's assets that have been expended as payment for services rendered in the management of the portfolio, expressed as a percentage of the average daily value of the portfolio or fund calculated over a period of a financial year by the manager of the portfolio or fund.

Leverage:

The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment. The total leverage amount is calculated across the entire portfolio. This total leverage amount is also split by provider and product type and shown as a contribution percentage to total leverage.

Disclaimer:

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, and maximum commissions is available on request from the manager, as well as a detailed description of how the fees are calculated and applied. The manager does not provide any guarantee in respect to the capital or the return of the portfolio. Portfolios may be closed to new investors in order to manage it more efficiently in accordance with its mandate. Where funds are invested in off-shore assets, performance is further affected by uncertainties such as potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information. The Manager retains full responsibility for the portfolio.
