#### **Notes**

- The fund has not been operating for the required five years. The fund invests in an underlying fund which has an established return
  history. To calculate the risk indicator, underlying fund returns have been used for the period to 31 December 2021 and fund returns
  thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
- The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%.
   However, the market index returns are shown before deducting fees and tax. Your tax may be lower.
