

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 Sep 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	11.21%
Annual return (after deductions for charges but before tax)	13.17%
Market index annual return (reflects no deduction for charges and tax)	14.62%

The market index return is ACI Conservative - Composite Index. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO). This has been the market index since the inception of the fund.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

What fees are investors charged?^{See note 2}

Investors in the ACI Conservative Fund are charged fund charges which are:

	% of net asset value (inc. GST)
Total fund charges	1.20%
Which are made up of:	
Total manager and admin charges (inc. GST)	1.20%
Including:	
Manager's basic fee (inc. GST)	1.20%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the ACI Conservative Fund on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$1,317 (that is 13.17% of his initial \$10,000). This gives Anthony a return after tax of \$1,121 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual Investment Mix

Foreign currency exposure was 80.00% hedged to New Zealand dollars as at 30 September 2024

Note: "Other" includes Derivatives

The strategy aims to hedge 100% of foreign currency exposures in the underlying international fixed-interest assets, 100% of property exposure and 50% of the underlying international equity assets. Currency exposure in Australian equities and Emerging Markets equities is unhedged. The overall target hedging ratio of the portfolio is 82%.

Target Investment Mix

Further information

You can also obtain this information, the PDS for the ACI Funds, and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 30 April 2023 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund has not completed a full scheme year as at 31 March 2024, historical fee information is not available.
