

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 Sep 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

## Notes

1. The fund invests in an underlying fund which has a 5-year return history. A combination of underlying fund and actual fund returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The underlying fund's returns have been used until 30 April 2023 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund has not completed a full scheme year as on 31 March 2024 (started accepting contributions on 11 April 2023), historical fee information is not available.
